

SOLAR iBOOST+

Uses your PV array to give you free hot water

Solar iBoost just got better....

- . More power saving potential
- *operates from lower export threshold*
- *cascading load to 2 immersions*
- . New connectivity with iBoost Buddy
- *remotely view savings & use BOOST*
- *home energy monitor shows import & export levels*
- . Improved heating controls.
- *programme timed grid power operations for 2 times in each day on 5 / 2 day format.*
- *This can be used to ensure that the tank reaches full temperature on a regular basis.*
- . Programme Summer & Winter grid operation settings
- *programme different seasonal settings and conveniently switch between them at the press of one button.*
- *switch settings remotely on optional iBoost Buddy.*
- . Mains Power the Sender
- *an optional power supply is available to run the Solar iBoost+ Sender from the grid instead of batteries if desired.*
