

Make the most of your solar energy with Solar iBoost+

Solar iBoost+ uses proven tech to divert surplus solar energy and heat water automatically via your immersion heater.

1 Wireless clamp detects and sends export data to Solar iBoost+.

2 Automatically feeds immersion with available surplus energy.

3 Hot water made from solar energy, with manual boost if needed.

Save on energy bills

Intuitive and smart

Simple and reliable

Optional iBoost+ Buddy

Why choose Solar iBoost+

Maximise your savings: Automatically diverts excess solar PV energy to heat your water.

Reduce your bills: Cuts runtime and costs of boilers or heat pumps.

Battery compatible: Works alongside battery storage; can divert only when batteries are full.

Heat pump friendly: Supports systems with Air Source Heat Pumps (ASHPs).

Simple and quick to install: Most installations are completed in under an hour.

Available nationwide: Through all major electrical and solar wholesalers.

iBoost+ Buddy - Remote Control

The iBoost Buddy is our device to monitor home energy usage, to view current or past diversion amounts and how much money you have saved by diverting excess energy it also allows remote control of Solar iBoost+ to “boost” your hot water.
